About NDI

From a **state-of-the-art overseas production** to the **room of a gaming streamer**; from a **smart network of traffic flow analysis** to the most challenging **remote surgeries**; from an auction with **thousands of bidders** on social media to a **parent calming their baby through a monitor**;

As video evolves, it unveils a common thread connecting all these new use cases and exciting possibilities. One breakthrough that redefines video:

There is no video without connection.

NDI is the technology connecting the videoverse. Together with our growing ecosystem of adopters, we are developing the most efficient, easy-to-use, and interoperable technology for video connections everywhere. NDI-enabled products are instantly discoverable in a standard IP network without requiring complex setups. They can then send or receive high-quality, low-latency video, audio, controls, and metadata, all in the same stream.

NDI connectivity technology delivers three core promises:

High Efficiency

Consume less bandwidth to provide visually lossless video up to 4k60 through our most advanced formats like HX3;

Integrate NDI on a hardware or software layer, adapting processing performance to your needs;

Eliminate expensive cables and gear while preparing your setup to **scale cost-effectively**.

Plug & Play

Discover, organize, and connect multiple devices in a **seamless, intuitive experience**;

Connect any NDI-enabled device over standard ethernet without requiring custom networking.

Interoperability

Enable true compatibility with a growing ecosystem featuring thousands of products, from consumer devices to professional-grade hardware and industry-leading software;

Unlock bi-directional transmission to send and receive video, audio, and metadata, controlling devices remotely over the same video stream.

Meet the NDI team at NAB 2023

Whether you want to talk business, dive deeper into our technology, discuss co-marketing activities, or get to know the team behind our tech, the right person to answer your needs will be on the Las Vegas Convention Center floor.

Where to find us

West Hall — Connect

NAB 2023

Each year, thousands of content professionals from all corners of the media, entertainment and technology ecosystem go to NAB Show.

It's designed for those striving to drive listeners and engage viewers in larger numbers for greater reach. And it's imagined for those seeking to create uncommon audio and visual experiences.

No matter where you fall on the content continuum—from creation to distribution, management to monetization—this is where you'll find a renewed path to clarity and confidence that takes your work in bold new directions.

NAB Show is produced annually by the National Association of Broadcasters at the Las Vegas Convention Center in Las Vegas, NV. NAB is the premier advocacy association for America's broadcasters. NAB advances radio and television interests in legislative, regulatory and public affairs. Through advocacy, education and innovation, NAB enables broadcasters to best serve their communities, strengthen their businesses and seize new opportunities in the digital age. Learn more at www.nab.org.

Presentations and events

Main Keynote

NDI 2023 Keynote + Community reception

NDI will present a new business vision, brand, and product architecture, consolidating the growth from protocol to a fully independent technology company. Following the presentation, NDI will host a reception with food and drinks, open to everyone who wants to engage with the NDI team and community.

Speakers: Tarif Sayed, NDI President and GM

Sunday, April 16th – 5pm to 7pm

Vizrt Group booth W2821, West Hall - Las Vegas Convention Center.

Our Partners at NAB

Although we will have a dedicated space at booth **W2821**, our technology will be widely showcased at the Las Vegas Convention Center. **We are proud to be adopted by over seventy companies that will present at NAB 2023.**

Most of these brands are NDI partners, harnessing the features of NDI Advanced, our most complete offer. You will also be able to find members of our extended NDI ecosystem that have been using the NDI SDK to provide better video connections. You can find a full list below and detailed info about each partner on the next pages.

Our Partners at NAB

in alphabetical order

Adobe

[Visit Adobe](#)

Adobe believes creativity empowers transformation — personally, professionally, and across all industries. We not only deliver strong financial results, but we're also driving incredible innovation, adding millions of new customers, delivering billions of experiences across screens, and processing trillions of data transactions online.

NDI Advanced

Booth Number: **N2438**

Apantac

[Explore Apantac at NAB](#)

Apantac will highlight "smart" SDM interfaces, based on the Intel® Smart Display Module Platform including an NDI Quad-Split Multiviewer, which provides the ability to decode and display four NDI v5 high bandwidth streams and provides a quad-split display with OSD. Adding to its SDM showcase, Apantac will exhibit an NDI receiver SDM interface. This NDI v5 high bandwidth receiver is equipped with an FPGA-based low latency decoder and supports resolutions up to UHD@60Hz, RGB 444.

NDI Advanced

Booth Number: **N2038**

Amagi Media Labs

[Visit Amagi Media Labs](#)

Amagi is a next-generation media technology company that provides cloud broadcast and targeted advertising solutions to broadcast TV and streaming TV platforms.

NDI Advanced

Booth Number: **W1401**

ATEN Technology Inc.

[Explore ATEN at NAB](#)

ATEN stands out as the ultimate provider of AV/IT connectivity and management solutions, renowned for exceptional quality and unbeatable value. Its portfolio includes an impressive range of top-notch integrated KVM, Professional AV, SOHO, and Intelligent Power solutions, all available at prices that are simply unmatched in the market.

NDI Advanced

Booth Number: **N2476**

AJA Video Systems

[Explore AJA Video Systems at NAB](#) Booth Number: **W2600**

AMD

[Visit AMD](#)

For more than 50 years AMD has driven innovation in high-performance computing, graphics and visualization technologies. Billions of people, leading Fortune 500 businesses and cutting-edge scientific research institutions around the world rely on AMD technology daily to improve how they live, work and play. AMD employees are focused on building leadership high-performance and adaptive products that push the boundaries of what is possible.

NDI Advanced

Booth Number: **W1401**

ATOMOS

[Visit ATOMOS](#)

Atomos' new NDI HX2 firmware update supports NDI HX2 transmission up to 1080p60 with Shogun CONNECT and Ninja V+ with ATOMOS CONNECT. This makes it possible to use pretty much any HDMI or SDI-equipped camera as a mobile NDI source. From a single, battery-operated device, Atomos provides wireless or wired NDI transmission, a live viewfinder and local recording. Once NDI is enabled to transmit, the video stream is available to any suitable device on the local area network sub-net.

NDI Advanced

Booth Number: **C4135**

BirdDog

[Visit BirdDog](#)

BirdDog is the industry leader in NDI enabled video production hardware and software and constantly pushing the boundaries of what's possible.

One of the highlights of BirdDog's NAB showcase will be their category defining range NDI enabled PTZ cameras, including indoor and outdoor options. All cameras feature a Sony Exmor R image sensor for maximum picture quality and the ability to colour match with Sony production cameras.

NDI Advanced

Booth Number: C3319

BZBGear

[Explore BZBGear at NAB](#)

Witness firsthand at NAB Show 2023 the multi award-winning BG-ADAMO-4K series featuring the newest NDI standard, NDI|HX 3. The ADAMO-4K's exceptional auto-tracking capability is powered by the latest human tracking AI algorithm, eliminating the need of camera operators or external hardware. It outputs 4K@60Hz and supports HDMI, 12G-SDI, USB 2.0/3.0, and LAN. Sporting LED tally lights, a microSD card writer with 1 TB capacity, and Power over Ethernet while being offered in 12x and 25x optical zooms. Control with RS-232, RS-422, web GUI, IR remote, or BG-PTZ-Control app—a free BZBGear proprietary PTZ control software for Windows, Mac, iOS, and soon, Android.

NDI Advanced

Booth Number: C5941

Broadfield Distributing

[Visit Broadfield Distributing](#)

Broadfield Distributing Inc. is the leading distributor of live production and streaming equipment; cinema, studio and broadcast solutions, PTZ cameras, storage and of course a wide range of NDI products. Broadfield is also the host of NDI November – a popular virtual event series that highlights NDI products, workflows and solutions created by our vendors and our dealers. As the top NewTek Authorized Distributor, Broadfield has been offering resellers and system integrators NDI converters, cameras and software since their initial release.
